

CLAIMS

What is claimed is:

1. A bicycle accessory device comprising:
 - a bracket adapted to be mounted to a bicycle, said bracket including a mount;
 - a support removably connected to said mount;
 - a first quick release connection between said support and said mount;
 - a bicycle accessory removably connected to said support; and
 - a second quick release connection between said support and said bicycle accessory.
2. The device as recited in claim 1 wherein said bracket is secured to said bicycle by an attachment mechanism.
3. The device as recited in claim 1 wherein said mount is tubular.
4. The device as recited in claim 1 wherein said bracket includes a first portion having a pair of fingers that receive a frame of said bicycle and an opposing second portion having an aperture to receive an attachment mechanism that secured said bracket to said bicycle.
5. The device as recited in claim 1 wherein said support further includes a lower portion having one of two pins resiliently biased outwardly and two holes and said bracket further includes the other of said two pins and said two holes, and said two pins are received in said two holes when said support is attached to said bracket.
6. The device as recited in claim 1 wherein said two pins are pressed inwardly to remove said support from said bracket.
7. The device as recited in claim 1 wherein said support further includes an upper portion having one of two pins resiliently biased outwardly and two holes and said accessory includes the other of said two pins and said two holes, and said two pins are received in said two holes when said accessory is attached to said support.

8. The device as recited in claim 7 wherein said two pins are pressed inwardly to remove said accessory from said support.
9. The device as recited in claim 1 wherein said first quick release connection is aligned with said second quick release connection.
10. The device as recited in claim 1 wherein said removable accessory is a storage rack including a mount, and said mount is removably attached to said support.
11. The device as recited in claim 10 wherein said storage rack is pivotally attached to said mount.
12. The device as recited in claim 10 further including a pin, wherein said storage rack includes a first hole and said mount includes a second hole, and said pin is inserted into said first hole when aligned with said second hole to prevent pivoting of said storage rack relative to said mount.
13. The device as recited in claim 1 wherein said removable accessory is a flag.
14. The device as recited in claim 1 wherein said removable accessory is a handle.
15. The device as recited in claim 1 wherein said removable accessory is a wheeled trailing device.
16. The device as recited in claim 15 further including a flexible tube between said support and said trailing device.
17. The device as recited in claim 1 wherein said removable accessory is a kickstand, and said support includes a pivot.

18. A method of removably attaching a bicycle accessory comprising the steps of:
removably attaching a support to the bicycle with a first quick release
connection; and
removably attaching a removable accessory to said support with a second
quick release connection.
